

Statement from the Lincoln School Committee

March 2, 2024

For over a decade, The Lincoln School Committee has authorized basic maintenance and held back major capital requests for the Hartwell Pods, Strat's Place playground, the adjacent parking lot and green spaces while the town considered whether to construct a Community Center on the school campus.

If Town Meeting decides to approve building a Community Center on school property and voters approve funding, the School Committee will support our administration in working on plans to provide temporary accommodations for existing programs on the Ballfield Road campus during construction.

If Town Meeting decides not to build a Community Center at this time, the School Committee will come back to ask future Town Meetings to fund long-term resolutions for the pods and surroundings.
